A. PURPOSE

The City of Reading is seeking proposals for engineering Services to assist the City of Reading Public Works Department by providing engineering design stage, bidding stage engineering assistance and construction stage engineering assistance Services for the Buttonwood Gateway Project. The cost proposal shall detail the tasks and deliverables for the work with associated hours and costs by staff. Attachment 2, Sketch Plan, of 46 residential rental units, community building, and vegetable garden was submitted in 2018 to the City Planning Commission. The Developer expects to begin work during 2020.

The overall goal of this project is to upgrade the City of Reading utility and street infrastructure along the 400 blocks of Tulpehocken and Gordon Streets and the 200 blocks of Speidel and Lafayette Streets. One main element is rehabilitation of existing sanitary sewer piping, laterals and manholes.

A second main element is street repaving, adding/replacement of curb along streets where curb maybe missing or in poor condition and adding/replacement of sidewalk where it is missing or in poor condition so as to provide pedestrian connectivity. ADA handicap ramps will be added. Replacement of traffic signs and pavement markings shall be provided to meet current standards/requirements at street crossings.

The project will be constructed in phases as described below:

- Phase 1 will include rehabilitation/replacement of existing sanitary sewer pipe, laterals and manholes;
- Phase 2 will include street repaving, adding/replacement of deteriorated curb and sidewalk, tree removal and replacement, and green area restoration.

B. SCOPE OF SERVICES

The selected consulting firm (the Consultant) shall provide design, bidding and construction stage Services that are based on the following guidelines:
PHASE 1 – Rehabilitation/Replacement Sanitary Sewer Pipe, Laterals and Manholes

1. Tulpehocken Street – Use City GIS based location and depth data, City CCTV and PipeLogic, Inc. reports to determine rehabilitation/replacement extents for existing 12-inch vitrified clay pipe. Consultant shall tele-video existing manholes and sewer laterals to determine existing condition and extents of rehabilitation/replacement.

2. Gordon Street – Use City GIS based location and depth data, City CCTV and PipeLogic, Inc. reports to determine rehabilitation/replacement extents for existing 10-inch vitrified clay pipe. Consultant shall tele-video existing manholes and sewer laterals to determine existing condition and extents of rehabilitation/replacement.

3. Speidel Street – Use City GIS based location and depth data, City CCTV and PipeLogic, Inc. reports to determine rehabilitation/replacement extents for existing 8-inch vitrified clay pipe. Consultant shall tele-video existing manhole and sewer laterals to determine existing condition and extents of rehabilitation/replacement.

4. Lafayette Street - Use City GIS based location and depth data for manholes. Consultant shall tele-video existing manholes to determine existing condition and extents of rehabilitation/replacement.

PHASE 2 – Street Repaving, Deteriorated Curb and Sidewalk Replacement and Restoration.

1. Tulpehocken Street – replacement of deteriorated curb, deteriorated base repair and wearing course replacement; compliant ADA curb ramps where not included by Sketch Plan, new traffic signs; and replacement of deteriorated sidewalk in areas other than proposed Buildings 6 and 7.

2. Gordon Street - replacement of deteriorated curb, deteriorated base repair and wearing course replacement; compliant ADA curb ramps where not included by Sketch Plan; new traffic signs; and replacement of deteriorated sidewalk in areas other than proposed Buildings 1, 2, 3 and 10.

4. Lafayette Street - replacement of deteriorated curb, deteriorated base repair and wearing course replacement, and new traffic signs.

The new/proposed construction work scope items shall be identified by field reviewing the condition of sanitary sewer piping, manholes, sewer laterals, asphalt pavement, concrete/asphalt/stone curb, and concrete/brick/asphalt sidewalk. The City will provide tele-video reports of existing sanitary sewer collection piping.

The design shall utilize PennDOT highway design and construction standards to the fullest extent applicable to this project. Technical specifications shall be prepared for all elements of the design including any special conditions that would supplement PennDOT Publication 408 specifications.
or other PennDOT construction standards. The Consultant’s final construction drawings and design specifications shall require Contractor designed and specified ADA compliant curb ramps at locations based on the most current PennDOT publications and guidance. Contractor designed crosswalk markings at intersecting streets are to be included and satisfy compliant ADA accessibility requirements. The final engineering design drawings and specifications shall be reviewed and approved by the City prior to construction bidding and prior to the contractor’s installation.

The Consultant shall communicate and coordinate with the City’s project manager throughout all phases and stages of the Project. Include four (4) project meetings with the City design team and two (2) conference calls. No public meetings are expected. The Services shall include an engineering evaluation of existing street pavement conditions to determine a basis for repairs of the road base and for overall design of repaving the streets. Proposal rigging and other efforts to restrain competition, and the making of false sworn statements in connection with the submission of bids are unlawful and may be subject to criminal prosecution. The person who signs the Affidavit should carefully examine it before signing and assure himself or herself that each statement is true and accurate, making diligent inquiry, as necessary, of all other persons employed by or associated with the Proposer with responsibilities for the preparation, approval or submission of the Proposal.

4. If the Proposal is submitted by a joint venture, each party to the venture must be identified in the Proposal documents, and a Non-Collusion Affidavit must be submitted separately on behalf of each party.

5. The term “complementary proposal” as used in the Non-Collusion Affidavit has the meaning commonly associated with that term in the RFP process, and includes the knowing submission of a proposal higher than the proposal of another firm, any intentionally high or noncompetitive proposal, and any form of proposal submitted for the purpose of giving a false appearance of competition.

6. Failure to file a Non-Collusion Affidavit in compliance with these instructions will result in disqualification of the Proposal.
